Dubai, UAE

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Flutter Developer with 5+ years of experience designing, developing, and deploying scalable, high-performance cross-platform mobile applications (Android & iOS). Expertise in Flutter, Dart, Clean Architecture, BLoC/Cubit, Java Spring Boot, RESTful APIs, Firebase (Auth, Firestore, Analytics, Crashlytics, FCM), WooCommerce, CI/CD automation (GitHub Actions), Keycloak, OAuth 2.0, UAE Pass, and secure authentication systems. Proven track record delivering production-grade applications in fintech, media, e-commerce, and on-demand domains while optimizing performance, reducing crashes, enhancing security, and improving user engagement.

CORE SKILLS

- Mobile Development: Flutter, Dart, Javascript, ReactNative, HTML, CSS, Android, iOS, Cross-Platform Development
- Architecture & Design: Clean Architecture, MVVM, MVC, SOLID Principles, Scalable App Architecture
- State Management: BLoC, Cubit, Provider, Riverpod
- Backend & APIs: Java Spring Boot, RESTful APIs, Websockets, JSON, GraphQL, Firebase (Auth, Firestore, Analytics, Crashlytics, FCM)
- Databases: SQL, SQLite, Sqflite, Hive, NoSQL, MongoDB, Local Storage, Offline Caching
- Authentication & Security: OAuth 2.0, Keycloak, UAE Pass, Secure Token Handling, Encryption
- Performance & Optimization: Memory Management, App Profiling, Lazy Loading, Caching Strategies, Code Optimization
- CI/CD & DevOps: GitHub Actions, CI/CD Pipelines, Automated APK/AAB & IPA Builds, Version Control
- Tools & Technologies: Git, GitHub, GitLab, Postman, Android Studio, VS Code, Xcode, Jira, Agile/Scrum
- Third-Party Integrations: WooCommerce API, Payment Gateways, Push Notifications, Deep Linking, Agora SDK

PROFESSIONAL EXPERIENCE

Senior Full Stack Flutter Developer – Evoteq, Dubai (April 2026 – Present)

- Leading end-to-end development of full-stack applications across Flutter web and mobile platforms, delivering unified cross-platform user experiences.
- Designing and implementing scalable backend services using Java Spring Boot, supporting high-performance APIs and modular architecture.
- Integrating RESTful APIs between Flutter frontends and backend systems, ensuring seamless data flow and real-time functionality.
- Developing responsive web applications in Flutter, optimized for performance, accessibility, and multi-device compatibility.
- Collaborating with cross-functional teams to define system architecture, improve development workflows, and ensure production stability.
- Implementing clean architecture and best practices across frontend and backend layers, improving maintainability and scalability of enterprise systems.

Senior Flutter Developer (Contract) – Asharq News Network, Dubai (May 2025 – Dec 2025)

- Delivered enterprise-grade Flutter applications under aggressive timelines, ensuring 100% on-time production releases.
- Architected scalable solutions using Clean Architecture and BLoC, improving code maintainability.
- Integrated secure REST APIs for real-time financial data and live media streaming, supporting high concurrent user traffic.
- Optimized application performance through profiling and memory tuning, reducing crash rates by 35% and improving app startup speed by 40%.
- Implemented deep linking, push notifications, offline caching, and analytics tracking, increasing user engagement by 25%.
- Managed CI/CD pipelines and automated production deployments, cutting manual release effort by 50%.

Senior Flutter Developer – Global Innovative, Lahore (Jan 2022 – Apr 2025)

- Developed and maintained scalable cross-platform mobile applications in fintech, e-commerce, and media sectors with 99% app stability.
- Improved app responsiveness by 30% through optimized architecture, efficient API handling, and advanced caching strategies.
- Led full mobile development lifecycle for 6+ major applications from requirement analysis to Play Store/App Store deployment.

- Implemented secure authentication systems and third-party integrations, enhancing data security and compliance standards.
- Automated build and deployment processes using CI/CD, reducing release cycles from days to hours.
- Mentored 4+ junior developers, conducted structured code reviews, and improved overall code quality across teams.

Flutter Developer – Stellavant Technologies, Lahore (Feb 2021 – Jan 2022)

- Built and deployed multiple Android and iOS applications using Flutter with BLoC and Provider state management.
- Integrated RESTful APIs enabling real-time content synchronization and seamless user experience.
- Enhanced application performance by implementing lazy loading and local database solutions (Sqflite & Hive), reducing API load by 40%.
- Followed SOLID principles and modular architecture, improving scalability and long-term maintainability.
- Contributed to successful delivery of projects within Agile sprint cycles, meeting 100% of milestone deadlines.

KEY PROJECTS

- Asharq Bloomberg – Developed a financial media application featuring real-time APIs, secure Keycloak authentication, offline caching, Firebase Analytics, Crashlytics, and live streaming capabilities.
- Asharq Now – Built a large-scale OTT platform with Live TV, VOD, shows, movies, and podcasts, focusing on performance, scalability, and seamless media playback.
- RewardBee – Designed a digital rewards application with OAuth-based authentication, secure receipt management, and scalable backend integration.
- FastWheel – Developed a WooCommerce-powered car rental and vehicle marketplace application with custom rewards and secure payment flows.
- ChatCash – Engineered a secure messaging and video calling app using Agora SDK with encryption, real-time communication, and monetization features.
- Batwa – Developed a cryptocurrency wallet with live market data, secure transactions, and robust UI/UX for financial operations. E-Jero – Cashback & referral-based rewards platform.
- Additional Applications: Creademic, E-Jero, BloodCart, ShopJinni

EDUCATION

Bachelor of Computer Science – University of Lahore **(Sept 2017 – Jan 2022)**

CERTIFICATIONS

- Postman API Testing – 10Pearls Pakistan **(May 2024)**
- Flutter Development – 10Pearls Pakistan **(May 2024)**

KEY ACHIEVEMENTS

- Successfully delivered 10+ production mobile applications across fintech, media, OTT, e-commerce, and on-demand domains.
- Reduced application crash rates by up to 35% through structured architecture and performance profiling.
- Improved application load time and runtime performance by 30–40% using optimized state management and caching.
- Decreased deployment time by 50% through CI/CD automation.
- Contributed to applications serving thousands of active users with high availability and reliability.
- Recognized for delivering secure, scalable, and business-aligned mobile solutions under tight deadlines.
